EDUCATION

Texas A&M University – College Station, TX

Aug 2023 – Dec 2028

BS in Mechanical Engineering

GPA: 3.6

- Memberships: Society of Flight Test Engineers, American Society of Mechanical Engineers

Northeast Lakeview College – Universal City, TX

AS in Engineering

Dean's List & Honor Roll

EXPERIENCE

Electrical Engineering Intern

Jun – Aug 2026

CPS Energy – Calaveras Power Plant

TX

- Authored the plant's maintenance SOP for low-voltage generator circuit breakers, standardizing protection against generator malfunction and fleet-wide blackout risk
- Updated one-line diagrams and relay configurations across CPS's fleet as part of the central electrical engineering team, maintaining documentation accuracy for legacy and newly acquired plants
- Partnered with I&C and electrical teams on 30+ plant walkdowns and troubleshooting call-outs statewide to diagnose active equipment anomalies

Power Generation Intern

Jun – Aug 2025

CPS Energy – Rio Nogales Energy Center

TX

- Specified a 75 HP motor upgrade and pressure relief system for the plant's water-cooling loop, resolving chronic overheating and restoring full 3,400 GPM cooling capacity
- Tracked plant-wide gas valve issues via an Excel troubleshooting log and planned a cooling-pipeline bypass filter segment to increase water flow to the cooling towers

System Integration Engineer, Avionics & Propulsion

May 2026 – Present

Texas A&M Vertical Flight Design Team

College Station, TX

- Serve as systems integration liaison for Avionics & Propulsion, translating requirements from VFD's other subteams into specifications for flight controller, GNSS, ESC, motor, and power distribution selection
- Drafted 3 subsystem and full-aircraft wiring diagrams during onboarding, establishing baseline schematics for the subteam's integration work
- Apply propulsion analysis (eCalc), custom electrical circuitry, and ArduPilot-based flight testing within the Avionics & Propulsion subteam

Custom UAV & Motor Test Bench

Jun 2026 – Present

Personal Project

College Station, TX

- Building a 3D-printed modular test bench in SolidWorks to benchmark 1700kV propulsion units, with bench assembly and thrust/efficiency calculations targeted for completion this month
- Designing a 2.2m fixed-wing scout UAV with onboard camera tracking, targeting search-and-rescue/ISR applications

Crate OS – Personal Homelab

Feb 2026 – Present

Personal Project

College Station, TX

- Architected a Linux homelab orchestrating 20+ containerized services into sequenced pipelines for media processing, network honeypot probes, and automation tasks, using a local LLM to assist with server maintenance diagnostics
- Optimized internal hardware geometry and airflow pathways to ensure thermal stability during sustained loads

LEADERSHIP

Co-Founder

Spring 2025 – Spring 2026

Northeast Lakeview STEM Club

Universal City, TX

- Co-founded a STEM club and grew membership to 50+ students, securing funding to sustain programming for future club leadership
- Recruited and led a student design team through a year of CAD instruction and project assignment ownership; returned to oversee final launch day and the club's awards event

SKILLS

- DAQ Systems, Precision Soldering, FDM 3D Printing, CNC Machining, ICE Diagnostics, Machining
- SolidWorks (CFD, Flow Simulation), Altium Designer, MATLAB, Python, C/C++, Linux/IoT, ArduPilot
- Systems Integration, Electrical Diagrams, P&IDs, Fluids, Root Cause Analysis
